OFF/CROSS CHAIN

Lightning Network - Problems:

- Too Heavy for Hosting

FULL NODE

- Tens of Gigabytes Storage per Chain
- Constant Internet Connection

Lightning Network - Problems:

- Too Heavy for Hosting
- Too Slow in Routing

Talking About 1M Nodes

- Dijkstra: O(V^2+E) → 1 T Calculations → 500s（2.0 GHz CPU）
- Rollback When Failed → Hard to Make Through

Lightning Network - Problems:

- Too Heavy for Hosting
- Too Slow in Routing
- Tendency of Centralization

- Opening Channels Costs
- Prefer to Connect Hub Node

Lightning Network - Problems:

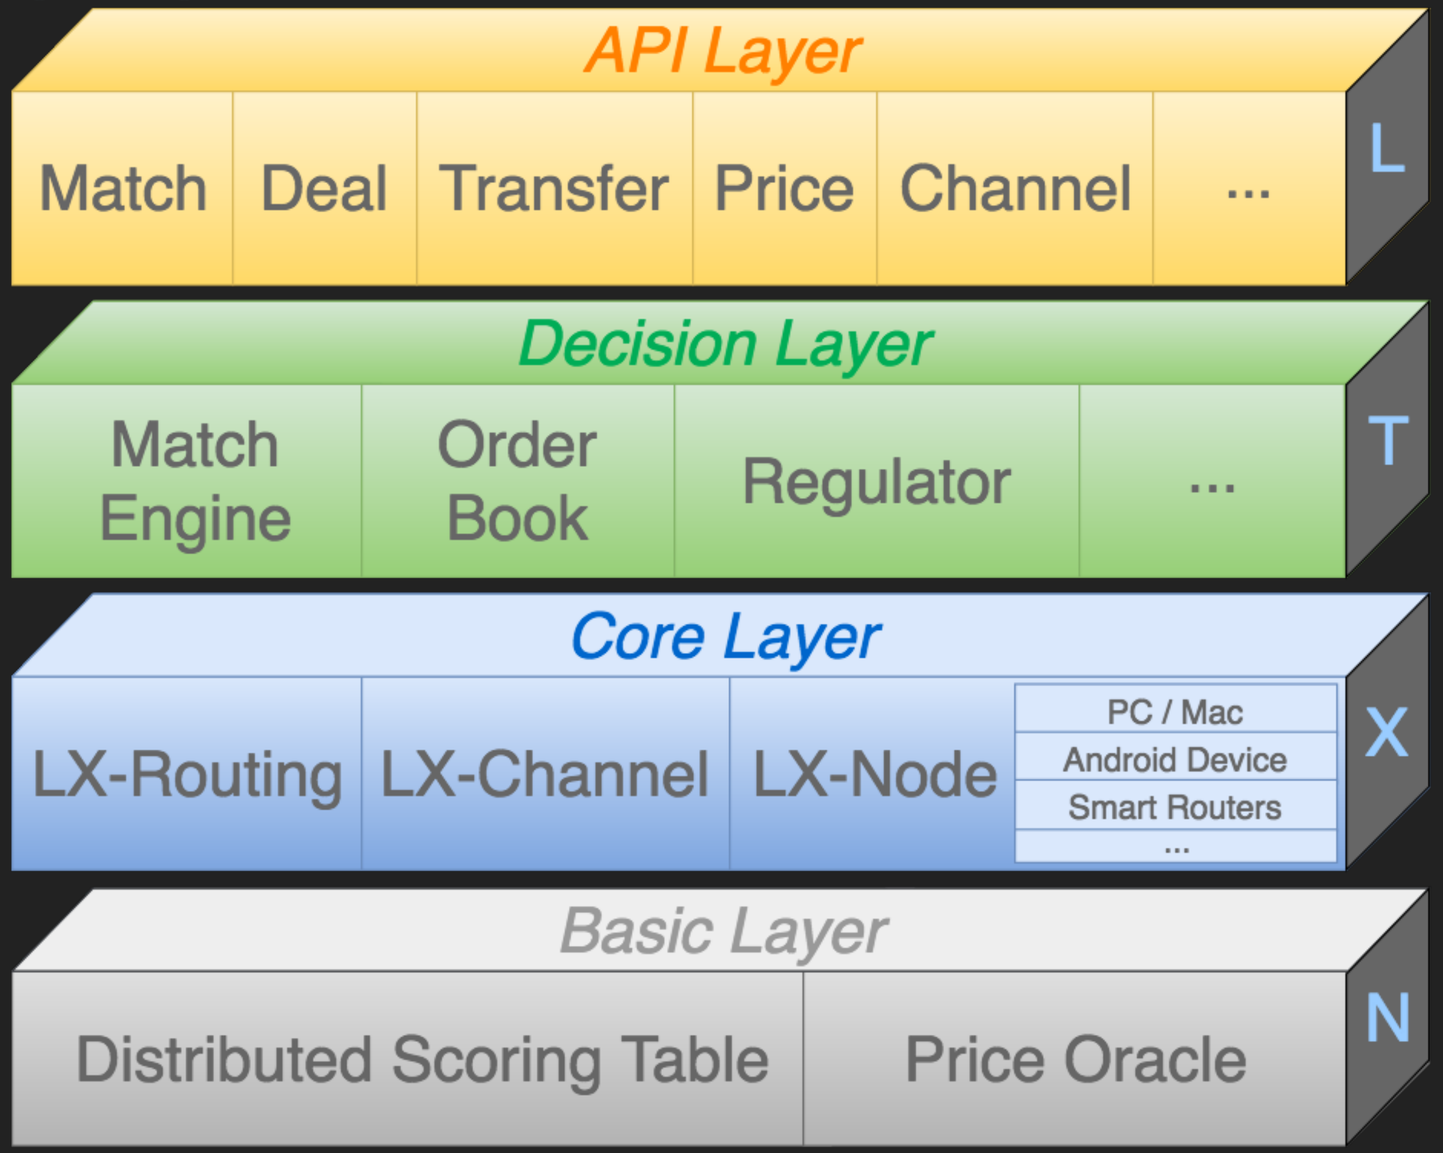
- Too Heavy for Hosting
- Too Slow in Routing
- Tendency of Centralization
- Channel: Dry Up

Channels Can’t Last Long

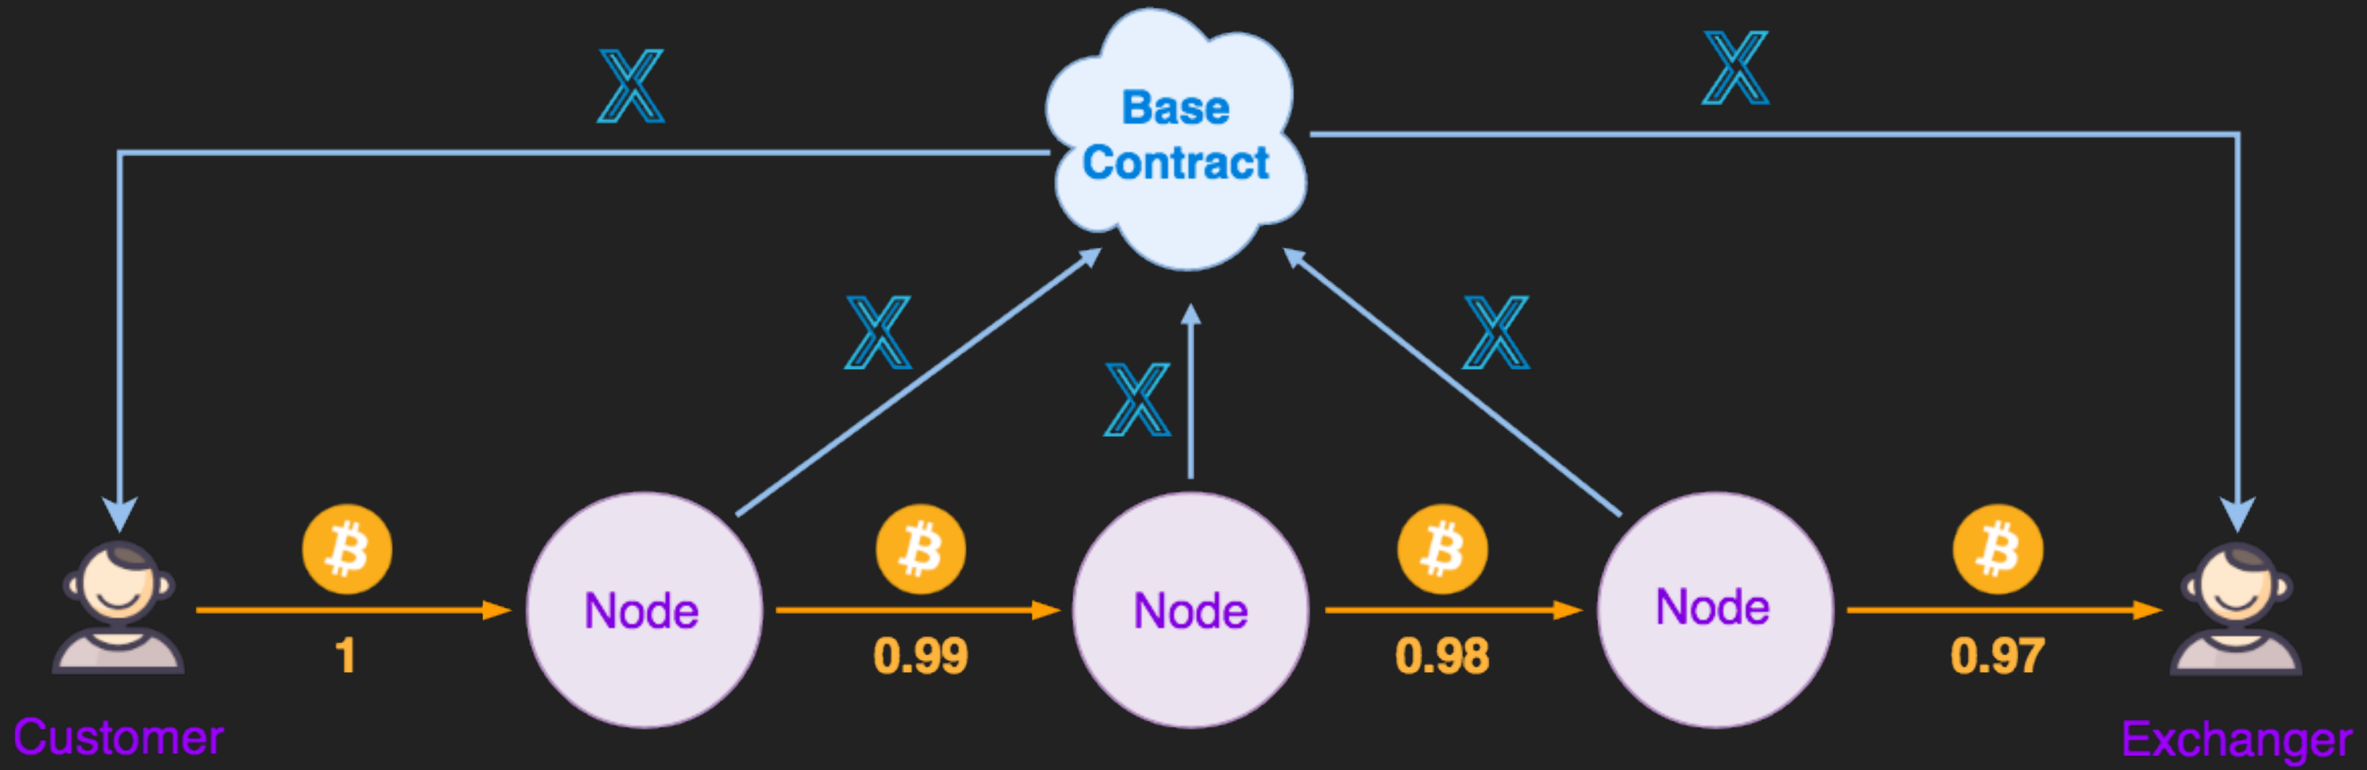
LITEX Network - LTXN

- Light Nodes on SmartPhones
- Distributed Routing
- Restrain of Centralization
- Key Improvements on BOLT
- Smart Matching Ability

LTXN Overview



LTXN Ecosystem



Killer App - LITEX - LTXN Applications
